FOR THE EU IMPORTER

Whey › Not exceeding 1,5 %

CN code 0404 10 12 · Export Argentina › European Union · The whole European Union

> **The agreement does not reduce the duty on this line, so the MFN duty remains, €100.4/100 kg/net.**

1. Product and tariff code

Nomenclature	Code	Official description
NCM (Argentina)	0404.10.00	Lactosuero, aunque esté modificado, incluso concentrado o con adición de azúcar u otro edulcorante
CN (European Union)	0404 10 12	Whey and modified whey, whether or not concentrated or containing added sugar or other sweetening matter: in powder, granules or other solid forms: not containing added sugar or other sweetening matter, of a protein content (nitrogen content × 6,38), by weight: exceeding 15 %, and of a fat content, by weight: not exceeding 1,5 %

2. Import duty in the EU

The agreement does not reduce the duty on this line. The duty is the MFN rate, **€100.4/100 kg/net**, now and in the years ahead.

Base rate (annex)	MFN duty in force	Today, with the agreement
€100.4/100 kg/net Appendix 2-A-1, line 0404 10 12 in CN 2013	**€100.4/100 kg/net** In force since 1 January 2026	**€100.4/100 kg/net** Excluded from liberalisation, it pays the MFN duty
Staging category	**Reaches zero**	
E	**Does not reach zero**	

No year-by-year table. This line is excluded from liberalisation. The agreement gives it no preference: the MFN duty applies, today and in the future.

No calculator. Argentina gets no reduction on this line and pays the base rate, so there is no saving to calculate.

3. Tariff-rate quota

The agreement opens no tariff-rate quota (TRQ) for this line. Nor does it get a reduction, because the agreement excludes it from liberalisation (category «E»), so it pays the MFN duty whatever the volume.

4. Proof of origin

What the importer needs to receive for EU customs to apply the preferential duty.

Rule of origin for this line, as published in the agreement. «Manufacture in which all the materials of Chapter 4 used are wholly obtained.»

What document grants the preference. A statement on origin made out by the exporter. EU customs apply the preferential duty when the importer presents it; without it the general (MFN) duty is charged. (iTA, Article 3.16)

Where it goes and how it is signed. On the invoice, the delivery note or any other commercial document that describes the product in enough detail to identify it, using the Annex 3-C wording below. It carries the handwritten signature of the exporter, unless the exporting country's rules provide otherwise. Argentina's rules do, and the statement is signed electronically or digitally on the TAD platform. (iTA, Article 3.17(5) and (6); Disposición SSCE 1/2026, Article 6)

The Argentine exporter's reference number. It is the exporter's CUIT, the 11-digit Argentine tax ID, and the statement is generated on the TAD platform (Trámites a Distancia) as a sworn statement. It is valid only for exports to the European Union. The origin is written as «MERCOSUR», not «Argentina». The agreement does not refer to REX registration: the reference number is the one set by the exporting country's rules. (Disposición SSCE 1/2026, Articles 2 to 5; Official guide to the Agreement (Argentine Foreign Ministry), Annex III, points 2.2, 2.3 and 9; iTA, Annex 3-C, notes 1 and 2)

How long it is valid. It is valid for 12 months from the date the exporter issues it, and is presented to customs within that period. It can be issued at export or afterwards, provided it reaches the customs of import no later than 2 years after the goods were imported. (iTA, Articles 3.17(7) and 3.18(1))

The certificate of origin, for now. Until 1 May 2029 the European Union also accepts a certificate of origin instead of the statement. The period may be extended by 2 years if Mercosur notifies it. (iTA, Annex 3-D, paragraphs 1 and 2)

What each side keeps. The importer keeps the statement, or a copy, for at least 3 years from import. The exporter keeps a copy and the documents proving origin for the same period. (iTA, Article 3.22)

If customs have doubts. The customs of import may verify the statement at random or when they have reasonable doubts. The Argentine authorities carry out the verification and, if the preference is suspended meanwhile, the importer is offered release of the goods subject to any precautionary measures required. (iTA, Article 3.25(1), (4) and (5))

THE WORDING OF THE STATEMENT

The exporter of the products covered by this document (exporter reference no…) declares that, except where otherwise clearly indicated, these products are of … preferential origin.

Exporter reference no: the CUIT of the Argentine exporter.
Preferential origin: MERCOSUR.
Below it go the place and date, the signature of the exporter and the name of the signatory in clear script.
iTA, Annex 3-C, English version

5. Border controls and requirements

The product is on the list of goods the European Union controls at the border, so **it enters through a border control post and with an official certificate**. It is a procedure to complete, not a prohibition, but without it the consignment is not cleared, even at zero duty. The Commission's portal (Access2Markets) assigns 8 EU product requirements to this line (technical, labelling or marketing rules). It assigns them to the whole line, and the table lists each one with its act and the link to check whether it applies to the product.

Type	Requirement	Status
SPS	Official control at an EU border control post. The consignment must enter through an approved border control post, be pre-notified in TRACES with a common…	Amber · must be met before shipment
Where it is handled	TRACES NT · EU consignment control system. The consignment is notified here before it arrives, and the certificate is issued by SENASA on the Argentine side.	Amber · procedure
Third-country list	Argentina is on the list of authorised countries.	Green · Argentina is authorised for «Milk»
Establishment approval	The plant, approved in Argentina and listed by the European Union. No data.	Grey · no data
Exporter registration	Registration as an exporter with Argentine customs. No data.	Grey · no data

Where a requirement ends in an ellipsis, its full text is on the online sheet.

Other EU product requirements listed by Access2Markets. Health control of products of animal origin for human consumption · Health control of products of animal origin not intended for human consumption · Control of contaminants in foodstuffs · Health control of Genetically Modified (GM) food and novel food · Control of pesticide residues in plant and animal products intended for human consumption · Control of residues of veterinary medicines in animals and animal products for human consumption · Labelling of foodstuffs · Traceability, compliance and responsibility in food and feed · Voluntary - Products from organic production.
